Dear Dr. Rivoire,

If your proposal entitled, "Next-Generation Runtime Systems for Multi-Objective Optimization" is selected for funding under the SC FAIR FOA, it is my intent, along with my colleague Dr. Tapasya Patki, to collaborate in this research by mentoring Sonoma State interns at LLNL during summer semester, by guest lecturing and providing class assistance to the relevant courses, and co-mentoring Sonoma State students during the regular academic year.

Thank you for the opportunity to participate.

Sincerely,

Barry Rountree, Ph.D.
CASC/LLNL
